

DELTA[®] PATORAL

Stronger newborns

BENEFITS

01

Sustained growth performance

Newborn vitality

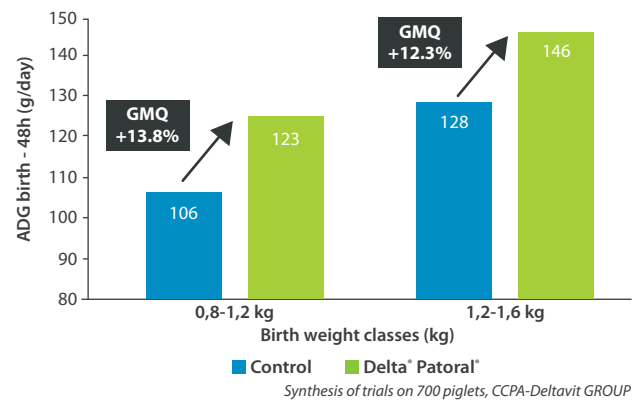

02

03

Farm profitability

SUPPORTING EVIDENCE

> Delta[®] Patoral improves the ADG of piglets within 48 hours of life

WHY USE UTILISER DELTA[®] PATORAL?

Less vigorous and less resistant, young animals are penalized from birth. Delta[®] Patoral makes it possible to deliver directly into the mouth of the newborn a cocktail of omega 3, energy and vitamins which improves its growth.

Delta[®] Patoral is a unique and innovative recipe tailor-made for optimal adaptation to the needs of the newborn:

- > Thick texture for good swallowing
- > Very palatable formula so as not to disturb milk consumption.

> Colostrum is one of the main ingredients of Delta[®] Patoral

MODE OF ACTION

At birth, the newborn has few energy reserves that are necessary for its survival. It needs an immediate supply of external energy to survive. Delta[®] Patoral provides the rapidly assimilable energy that the animal needs to warm up and boost its growth

COMPOSITION ELEMENTS

- > Quality raw materials: Fish oil, colostrum, medium chain triglycerides
- > A complete vitamin profile (A, B1, B12, C, D3, E, K3)

USAGE RECOMMENDATIONS

PIGLETS:

2 ml/animal just after birth. Possibly renew 5 hours after birth or the next day.
